

IPM

# Celebrating “DBI in the Sky”

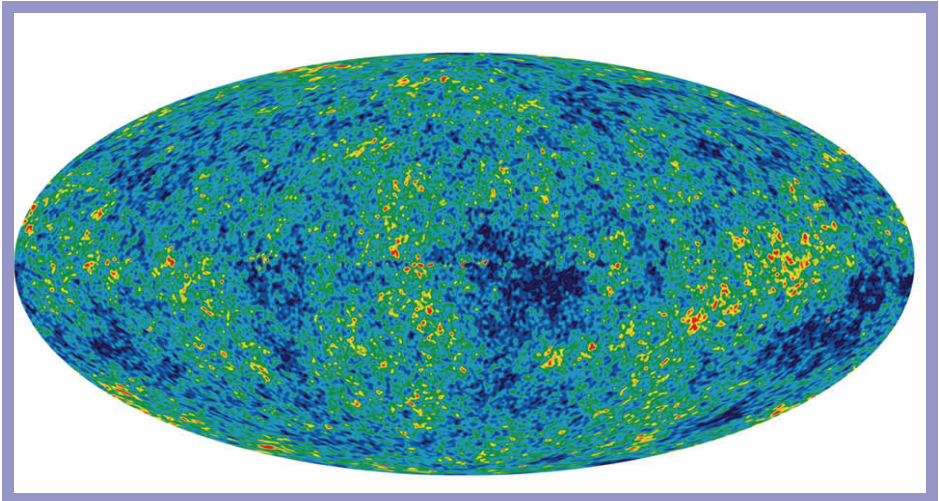

31 Farvardin 1391(April 19, 2012)

The paper “DBI in the Sky” by Alishahiha- Silverstein and Tong had profound impacts on inflation from high energy physics. Furthermore it provided a unique theoretical mechanism to observe non-Gaussianities on CMB fluctuations which will have significant observational implications.

According to INSPIRE website soon this paper will hit the milestone 500 citations. In recognition of this significant achievement the Early Universe Cosmology group at IPM organizes a one day workshop on Thursday 31 Farvardin 1391(April 19, 2012).

## Speakers

- A. A. Abolhasani
- M. Alishahiha
- R. Emami
- H. Firouzjahi
- A. Malek-Nejad
- M. Noorbala

Graduate students and researchers interested to participate in this activity please send a confirmation to "[conf@theory.ipm.ac.ir](mailto:conf@theory.ipm.ac.ir)" before Farvardin 25th.

## Organizer

- H. Firouzjahi

For more information, please see

<http://physics.ipm.ac.ir/conferences/dbi/index.jsp>

Registration deadline: 25 Farvardin 1391(April 13, 2012)

Place of Workshop: Niavaran Bldg, IPM, Tehran
