

**Title:** Aspects of AdS3 String Integrability

**Abstract:**

Following the success of integrability for obtaining the spectrum of the AdS<sub>5</sub> / CFT<sub>4</sub> duality, from weak to strong coupling, one of the open directions concerns less symmetric theories. My talk will be about various problems which arise in going to the AdS<sub>3</sub> case, chiefly that there is a massless sector which is not quite decoupled from the sector resembling AdS<sub>5</sub> closely.
