

Physics Colloquium

Publicizing Science in Iran

Speaker

Y. Farzan

Affiliation

Physics school, IPM

Date and time

Wednesday, 7th of Azar (28th of November), 4:30 pm

Place

Lecture room C, Farmanieh building

Abstract

Various goals can be enumerated for the cause of publicizing science. In this talk, from the perspective of a researcher based in Iran, I will outline what I expect from publicizing science to achieve in order to facilitate training the next generation of Iranian scientists. I will show why and how science publicizing in Iran should differ from that in developed countries. My particular attention will be on misperception of general public about the nature of modern science and the culture of scientists. I will then comment on the importance of

attention to **gender** and **linguistic issues** in a multi-lingual country such as ours.

Address: Institute for Research in Fundamental Sciences (IPM), next to Kouhe Nour Building, Farmanieh Ave.
