

**Tehran meeting on Cosmology**  
 5-10 August 2017, IPM, Tehran, IRAN  
 Details of scientific program  
**List of oral presentation by participants**

Date	Time	Name	Title
<b>Sunday 6 August</b>	17:30-17:45	Mr. Hossein Bazrafshan Moghaddam	Inflationary physics, Reheating after inflation, Cosmological Perturbation
	17:45-18:00	Dr. Vahid Kamali	warm tachyon inflation in LQC
	18:00-18:15	Dr. Marzieh Farhang	A multi-scale pipeline to search for string-induced CMB anisotropies
	18:15-18:30	Ms. Zeinab Shafiee	Determining Weak Gravitational Lensing Masses for Six Galaxy Clusters from the 400d X-ray Survey
	18:30-18:45	Dr. Behnam Javanmardi	Probing the isotropy of the distribution of galaxy types in the Local Universe
	18:45-19:00	Mr. Alireza Allahyari	Long gradient mode and large-scale structure observables I: linear order
<b>Wednesday 9 August</b>	17:30-17:45	Dr. Benjamin L'Huillier	Constraining the early Universe with the large-scale structure
	17:45-18:00	Ms. Hajar Vakili	Type I shell galaxies as a test of gravity
	18:00-18:15	Ms. Sara Jamali	On the Cosmology of MOG
	18:15-18:30	Dr. Basem Ghayour	The effect of gravitational waves on the sound waves
	18:30-18:45	Dr. Nosratollah Jafari	Precession of perihelia in the Fisher metric
